Most Attractive Risk/Reward in the Sector

We update our model following recent market dynamic, upgrading our 2027/28E EPS by 9%/20% (15-20% above cons) and therefore raising our price target to €1,900/share. This reflects increased conviction in a tightening industry environment, driving a more prolonged investment cycle extending into 2028. With SOXX up 65% YTD and the global SPIE average at 50-70%, we see ASML (c+35%) as one name still offering attractive risk/reward in Europe semis, and we reinstate it as our top sector pick.Our thesis is supported by three key drivers:

1. Lithography bottleneck concerns appear overstated

Capacity concerns have come into focus, with fears ASML could constrain semiconductor supply, but we see these as overstated. **Our analysis suggests ASML's 2027 capacity can support >50% y/y growth in leading-edge wafer output (logic & memory) vs ~25–30% demand**, with ~20% of this uplift driven by underappreciated throughput gains from Low NA. While productivity gains may modestly dilute litho intensity as other process steps (deposition, etch) struggle to keep pace, **we do not expect ASML to act as a bottleneck in the next 12/18 months.**

2. If we like memory over the next 1–2 years, we should like ASML (more)

Supported by a constructive memory outlook over the next two years (here), the supply chain is positioned to benefit—particularly participants with exposure to rising WFE intensity—as node shrinks drive ~30% higher dies per wafer (1b to 1c), increased lithography intensity, and an additional 1–2 EUV layers at 1d ('27/28E).**ASML is the most memory-exposed semi-cap name (~30–35% of revenues by 2026 vs. ~25–30% peers)**, reflected in stronger growth (23% memory CAGR 2020–25 vs. ~6%) and rising litho intensity (11% in 2020 to ~15% in 2025 and ~15–20% by '27/28E).

3.High NA story is not over yet - benefits too big to ignore

Despite some delay in TSMC adoption vs. our initial expectations (here), we still see High NA being adopted within 2–3 years. The value proposition remains strong: (1) 20-40% cost savings on critical layers vs. double/triple patterning and process simplification, and (2) meaningful capacity unlock by replacing low-throughput multi-patterning steps (e.g., ALD ~30 wph). **Our analysis suggests High NA can deliver >100% throughput gains vs. most alternatives, reinforcing its long-term adoption case.**

Valuation: DCF- based PT increases to €1,900 from €1,600 driven by EPS

We raise EPS by 9%/20% in 2027E/28E (15-20% above cons) to reflect a more sustained memory upcycle and continued strength in advanced logic, and therefore raising our price target to €1,900/share. On our estimates, ASML trades at 26x/21x 2027/28E P/E vs. a 12 month forward average of 30x, despite ~20% EPS CAGR (2026–30E), and at just a ~6% premium vs. a 10 year average of ~84% vs US peers.

THREE REASONS TO BUY ASML

In a context of a lagging performance as seen below, we address three important reasons as to why ASML becomes again our top pick: 1) Capacity remains above demand; 2) Memory litho share keeps increasing and 3) High NA story is not over yet. We also see the catalyst path ahead Five Key Catalysts Over the Next 12 Months

Forecast changes

We revise our projections, primarily reflecting stronger revenue growth in memory and advanced logic, which influences EUV as well as DUV, excluding China. We now anticipate EUV revenues to grow 37% YoY and 10% YoY in 2027/2028E compared to prior estimates of 26% and -1%, respectively. Consequently, we also expect DUV revenue growth of 28% and 24% YoY versus earlier forecasts of 16% and 17% YoY.

Here are the main changes by end market:

Memory (38% of product sales in 2026E): We now project +35% YoY/+10% YoY growth in 2027/2028E, revised upward from the previous estimate of +35%/-10%, as we anticipate the memory cycle will likely extend through 2028E given the prevailing constraints. Additionally, we expect the 1d ramp-up in 2027/2028 to be more lithography-intensive.

Foundry/Logic (62% of product sales in 2026E): We now forecast growth of +34% YoY in 2027E and +18% YoY in 2028E, revised upward from our prior estimates of +16% and +17%, respectively. This adjustment is primarily attributed to improvements in Intel and Samsung foundry operations, as well as increased investment in 2028E driven by TSMC capacity constraints anticipated in 2027.

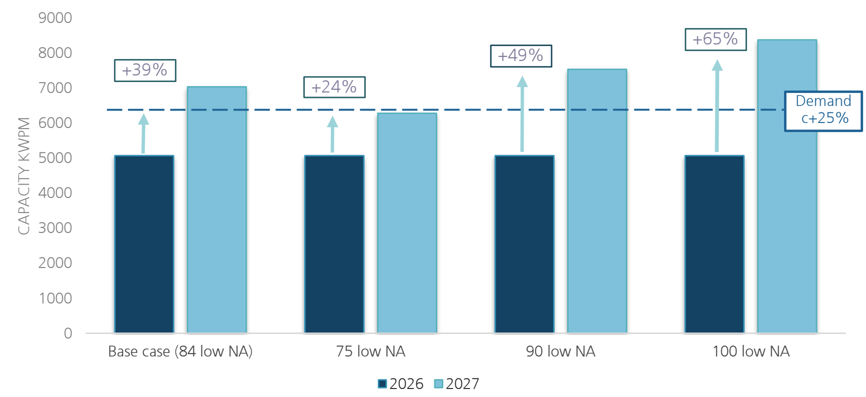
1) We see potential ASML capacity still meaningfully higher than demand.

Conclusion: In light of the recent focus on production capabilities and prevailing concerns that ASML might emerge as a bottleneck in the supply chain, we present an evaluation of how their capacity could influence supply-demand dynamics. A critical factor **we believe the market has largely overlooked is the enhanced throughput across various low NA models, coupled with the potential for system upgrades and shorter cycle times enabled by "fast" shipments**. Although ASML has communicated a capacity of over 80 EUV units in 2027, our analysis suggests their actual theoretical maximum capacity could exceed 100 units, excluding additional contributions from fast shipments. Based on our estimates, production of 100 EUV units at present would represent approximately a 65% YoY increase in leading-edge capacity, compared to projected demand growth of around 25-30% YoY in 2027. Conversely, production of 85 tools would indicate roughly a 34% YoY increase, still exceeding demand expectations, as we believe extended lithography lead times may drive prebuilding efforts targeting 2028. **Nonetheless, we believe ASML's enhancements in productivity come with a marginal trade-off in litho intensity, as other equipment categories, such as deposition and etching, face challenges in keeping pace with this roadmap. Consequently, lithography-related expenditures are rising at a slower rate compared to other segments.**

Evidence: wafer per month roadmap showing significant productivity improvement.

Figure 5: Incremental capacity 2027 (kwpm y/y) vs 2026 based on different shipments - We estimate ASML capacity to be well above demand



Source: UBSe, Company data

Given the recent emphasis on production capacity and widespread concerns that ASML could become a limiting factor in the supply chain, we provide an analysis of how their capacity might impact supply and demand dynamics. One key aspect we believe the market has overlooked is the increase in throughput across various low NA models, along with the potential for system upgrades and reduced cycle times through expedited shipments. While ASML has indicated a capacity of 80+ EUV units in 2027E, we estimate their effective theoretical capacity could approach 100+ units.

In 2021, ASML communicated a capacity of 90 low NA EUV units, which we believe was based on a throughput of approximately 220 wafers per hour (wph). By 2027/28, this throughput could reach 260 wph with the F model. Adjusting for this improved throughput, the previously stated 90 EUV units would be equivalent to 100-105 units under current conditions. In 2026, shipments will still include some 3600D models, while the remainder will consist of 3800E systems. The 3800F model is slated to begin shipping in 2027, with production volumes increasing further in 2028.

In DRAM, the 3800F model offers an 87% throughput improvement compared to the 3600D, which will help mitigate the impact of significant capacity expansions in the sector. In the logic segment, the throughput increase is more modest, with the 3800F delivering an 11% gain over the 3600D.

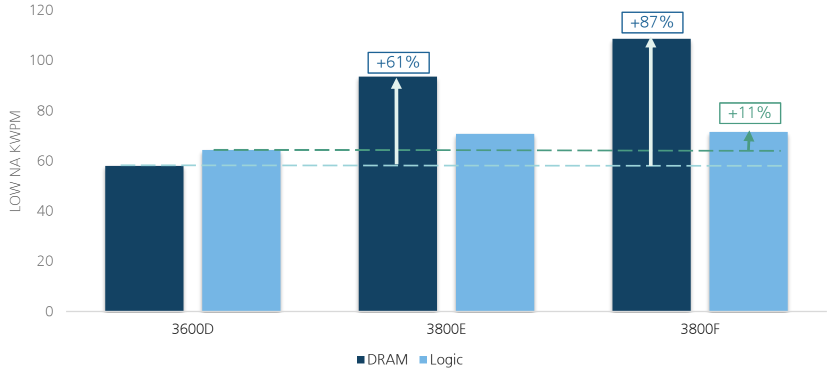
Figure 7: Low NA models throughput increases for DRAM and Logic



Source: UBSe, Company data

Based on our bottom up models of advanced logic/DRAM incremental capacity added as well as low NA layers, we calculate incremental EUV wafers out until 2028. This comes to +69% yoy in 2026 and 20% yoy in 2027. This is based on 10% growth in incremental capacity in DRAM in 2026 (289kwpm added) and a 32% increase in 2027 (382kwpm added). In Foundry/logic we assume a 59% growth in incremental capacity in 2026 (159kwpm added) and 31% in 2027 (208kwpm added).

Based on these estimates we look at low NA unit oversupply/undersupply scenarios for different low NA capacity targets in 2026/2027 and models. For 2026 the company target is 60 low NA tools, whereas for 2027 it will be 80. Based on 100% shipment of E model, ASML will undersupply the market by 6 low NA tools in 2026 and be inline with supply in 2027.

We also look at incremental capacity that could be unlocked in 2027 based on different mixes of E vs F (based on our unit shipment estimates - 65 in 2026 and 84 in 2027). Our base case is 20% of F and 80% of E model in 2027 which would come to 39% incremental capacity vs 2026. 2026 capacity numbers are based on 20% D and 80% E mix.

Again taking our unit shipment estimates we look at incremental capacity for our base case (80% E and 20% F) and then if it was 100% E and 100% F in 2027.

Then flexing our 2027 unit assumptions and keeping a fixed mix (base case above) we look at incremental capacity for a downside and upside unit scenario below.

Generally the required demand can be split between unit growth and throughput benefit as one shifts from D to E. Largely ASML can get a 20% uplift in capacity shifting from the E to D model which we plot below over the next few years.

2) ASML remains a key memory play not priced for it

Conclusion: With a constructive memory outlook over the next 2 years ([here]), the supply chain should benefit—especially players leveraged to rising WFE intensity—as customers drive node shrinks to boost dies per wafer (~30% uplift from 1b to 1c), supporting higher lithography intensity, with EUV layers set to increase by 1–2 at 1d ('27/28E). As a result, **ASML is now the most memory exposed semi cap name, particularly to DRAM, with ~30–35% of revs by 2026 (vs. ~25–30% for US peers), reflected in stronger growth (23% memory revs CAGR 2020–25 vs. ~6% peers) and rising litho intensity (litho/WFE from 11% in 2020 to ~15% in 2025 and ~15–20% by '27/28E).**

Evidence: EUV layer roadmap by node and ASML memory reported vs peers in the last 5 years, Micron public comments suggesting further EUV layer increase.

ASML has evolved over the years into a pivotal player in the memory sector, as evidenced below. We project that by 2026, ASML is likely to surpass its competitors once again, driven by the growing integration of EUV layers and an emphasis on DRAM production capacity. Notably, we believe that shrink remains a critical priority for memory manufacturers, as it facilitates fitting more dies per wafer (e.g., 30% more for 1c compared to 1b), thereby enabling significant capacity expansion through technological migration, particularly given constraints in cleanroom space. For instance, Micron highlighted during its most recent earnings call on March 16: "*We plan to increase EUV adoption at the 1-delta DRAM node utilizing the latest-generation EUV tools. These more advanced EUV tools will help us optimize both cleanroom space efficiency and patterning when scaling to 1-delta and beyond.*"

3) High NA story is not over yet - benefits too big to ignore

Conclusion: Despite some delay in TSMC adoption vs. our initial expectations (here), we still see High NA being adopted within 2–3 years. The value proposition remains strong: (1) 20–40% cost savings on critical layers vs. double/triple patterning and process simplification, and (2) meaningful capacity unlock by replacing low-throughput multi-patterning steps (e.g., ALD ~30 wph). Our analysis suggests High NA can deliver >100% throughput gains vs. most alternatives (~80% vs. LELE), reinforcing its long-term adoption case.

Evidence: reported cost savings per critical layers, availability roadmap, process steps disclosure from industry conferences

A way for ASML or customers to unlock even more capacity would be through the use of high NA, which will improve overall cycle time and in memory where reuse exists free up EUV tools for other layers. High NA will be replacing multiple patterning steps listed below, in early stages it would be predominantly LELELE low NA (triple patterning) and SAQP (quadruple patterning) to a lesser extent.

Figure 24: Key patterning steps for high NA single patterning and low NA multiple patterning

	ALD	ALD	Litho	Litho
	etch	etch	etch	etch
		ALD		Litho

Looking at the effective throughput for a single 'layer' by summing the individual steps, the use of high NA can save significant time/unlock incremental capacity. This is especially relevant in processes that use ALD which is the bottleneck in terms of wafer time.

Figure 25: Effective throughput for different patterning schemes

	High NA	Low NA

High NA 'throughput' increase		*365%*	*740%*	*80%*	*170%*

Source: UBSe, Company data

Also, as a reminder, High NA is also key to reduce costs and process steps as shown below which is likely to drive adoption in the coming few years especially as shrink could be a strong way to increase capacity from existing clean room space.

As previously discussed (here), High NA enables a process simplification compared with immersion-based multiple patterning but also low NA. Traditional immersion techniques like LE3, LE4, or SAQP+cuts can require between 27 to 60 process steps for critical layers, driving up cost, complexity, and defect risk. In contrast, Low NA EUV reduces this to around 10 steps, while High NA EUV can achieve similar or better resolution with steps in the single digits. **More recently, Intel claimed that 1 high NA EUV exposure & single digit process steps could replace 3 low NA EUV exposures and 40 steps, highlighting the significant simplification and cost savings that EUV can bring vs triple patterning low NA and even more recently that process steps can be reduced by a factor of 10**. This reduction translates into lower wafer costs, faster cycle times, improved yield and simpler design rules. This in turn makes High NA EUV a key enabler for efficient scaling at advanced nodes like A10 and beyond.

Forecast changes

We revise our projections, primarily reflecting stronger revenue growth in memory and advanced logic, which influences EUV as well as DUV, excluding China. We now anticipate EUV revenues to grow 37% YoY and 10% YoY in 2027/2028E compared to prior estimates of 26% and -1%, respectively. Consequently, we also expect DUV revenue growth of 28% and 24% YoY versus earlier forecasts of 16% and 17% YoY.

Here are the main changes by end market:

Memory (38% of product sales in 2026E): We now project +35% YoY/+10% YoY growth in 2027/2028E, revised upward from the previous estimate of +35%/-10%, as we anticipate the memory cycle will likely extend through 2028E given the prevailing constraints. Additionally, we expect the 1d ramp-up in 2027/2028 to be more lithography-intensive.

Foundry/Logic (62% of product sales in 2026E): We now forecast growth of +34% YoY in 2027E and +18% YoY in 2028E, revised upward from our prior estimates of +16% and +17%, respectively. This adjustment is primarily attributed to improvements in Intel and Samsung foundry operations, as well as increased investment in 2028E driven by TSMC capacity constraints anticipated in 2027.

Figure 31: We forecast 37%y-o-y/10% y-o-y EUV revenues in 2027/2028E vs 26%/-1% previously. As a consequence, we also estimate DUV revenues to grow 28%24% vs +16 y-o-y/17% previously.

Company Description

ASML is the leading supplier of lithography equipment for the manufacture of semiconductor devices. A Philips and ASMI spin-off established in 1984, ASML has progressively gained market share to become the leading supplier of lithography equipment to the semiconductor industry, with few able to compete at the leading edge. The company's products are critical to the ongoing advances in semiconductor technology. ASML supplies all major semiconductor manufacturers, including Samsung, TSMC, Intel and Hynix. Competition primarily comes from Nikon and Canon.

Valuation Method and Risk Statement

Macroeconomic conditions and a slowdown in end markets for semiconductors may lead to curtailment of spending on capital equipment and deferral/ postponement of orders placed with ASML. ASML will remain exposed to significant volatility given the cyclicality if its customers' businesses. Also, the business is currently exposed to significant execution risk around its next generation technology EUV. Our valuation for ASML is derived from a DCF-based methodology with of a WACC of 9% and terminal growth of 3%.

Buy	FSR is > 6% above the MRA.	54%	24%
Neutral	FSR is between -6% and 6% of the MRA.	40%	21%
Sell	FSR is > 6% below the MRA.	6%	21%

Source: UBS. Rating allocations are as of 31 March 2026.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Consultation (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

UBS Global Research Disclaimer

This document has been prepared by UBS AG London Branch, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates, including former Credit Suisse AG and its subsidiaries, branches and affiliates are referred to herein as "UBS".

Any opinions expressed in this document may change without notice and are only current as of the date of publication. Different areas, groups, and personnel within UBS may produce and distribute separate research products independently of each other. For example, research publications from **UBS CIO** are produced by UBS Global Wealth Management. **UBS Global Research** is produced by UBS Investment Bank. Research methodologies and rating systems of each separate research organization may differ, for example, in terms of investment recommendations, investment horizon, model assumptions, and valuation methods. As a consequence, except for certain economic forecasts (for which UBS CIO and UBS Global Research may collaborate), investment recommendations, ratings, price targets, and valuations provided by each of the separate research organizations may be different, or inconsistent. You should refer to each relevant research product for the details as to their methodologies and rating system. Not all clients may have access to all products from every organization. Each research product is subject to the policies and procedures of the organization that produces it.

This document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the document.

UBS Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing UBS Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All UBS Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where UBS Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by UBS Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS Global Research and UBS Evidence Lab and legal and regulatory constraints. UBS HOLT and UBS Pharma Values are offerings of UBS Global Research. HOLT Lens is a corporate performance platform offering that provides an objective accounting-led framework for comparing and valuing companies and is available to clients of UBS Global Research; for further details and pricing please contact your UBS Sales representative. In particular, HOLT has a variety of warranted prices based on the scenario chosen; please mail UBS Securities LLC, 11 Madison Avenue, New York, NY 10010, USA, Attention: Investment Research, if you are interested in the warranted price on a particular company, again subject to commercial considerations. UBS Pharma Values is an analytical tool that involves the creation of a number of individual product net present value calculations, based on published forecasts of sales for pharmaceuticals, and is available to clients of UBS Global Research; for further details and pricing please contact your UBS Sales representative. For all other specific disclaimers, please see https://www.ubs.com/disclosures.

When you receive UBS Global Research through a system, your access and/or use of such UBS Global Research is subject to this UBS Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive UBS Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this UBS Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (https://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (https://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (https://www.ubs.com/global/en/legal/privacy/users.html).

If you receive UBS Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via UBS Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via UBS Global Research or otherwise, without the prior written consent of UBS. You agree not to use UBS Global Research in any artificial intelligence system, without the prior written consent of UBS.

In certain circumstances you may receive UBS Global Research otherwise than in the capacity of a client of UBS and you understand and agree that under these circumstances (i) the UBS Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the UBS Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at https://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

UBS notes that no globally accepted framework or definition (legal, regulatory or otherwise) currently exists, nor is there a market consensus as to what constitutes an "ESG" (Environmental, Social or Governance) or an equivalent-label, or as to what precise attributes are required for the Information (as defined below) to be defined as ESG or equivalently-labelled. Any information, data or other content including from a third party source contained, referred to herein or used for whatsoever purpose by UBS or a third party ("Information"), in relation to any actual or potential ESG objective, issue or consideration is not intended to be relied upon for ESG classification, regulatory regime or industry initiative purposes ("ESG Regimes"). Nothing in these materials is intended to convey, suggest or indicate that UBS considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG classification, labelling or similar standards that may exist under the ESG Regimes. UBS has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For further information on the ways in which UBS Global Research manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS Global Research recommendations, please visit https://www.ubs.com/disclosures.

UBS Global Research will initiate, update and cease coverage solely at the discretion of UBS Global Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

UBS Global Research may utilise artificial intelligence tools (“AI Tools”) in the preparation of this document. Notwithstanding any such use of AI Tools, this document has undergone human review.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by UBS Global Research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Please note that all transactions conducted by UBS are consistent with sanctions regulations imposed by Switzerland, the European Union, the United Nations, the United Kingdom and the United States, per UBS' global sanctions policy. UBS opinion as to future investment worthiness assumes no new sanctions are imposed.

US persons are prohibited from purchasing or selling securities of certain companies designated as being associated with the Chinese Military in accordance with the amended US Presidential Executive Order 13959.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is **for your information only**; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/research-methodology.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio incorporating ESG factors or Sustainable Investing considerations may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.
