Advertising Trajectory Remains Strong, But Traffic and User Challenges Resurface; Remain Neutral, \$185 PT

RDDT shares traded down -11% post-close despite strong 2Q financial results & 3Q guidance, w/Google traffic headwinds pressuring DAUq trends. In the US, Logged-In DAUq declined -100k Q/Q & Logged-Out DAUq declined -200k driven by ongoing changes to the Google search ecosystem, while int'l user trends were also pressured by changes to machine-translated content rankings. The traffic headwinds were choppy through the quarter and worsened into the end of 2Q, with visibility remaining limited QTD. **Bigger picture, we believe the ongoing traffic volatility from Google's evolution toward AI Overviews will be a key focus area for RDDT during its ongoing data licensing renewal negotiations.** RDDT emphasized that there are many layers & dimensions to its relationship with Google, & while the new deals are not necessarily all or nothing, the ultimate goal is to establish arrangements that drive users into the Reddit ecosystem to maximize value. Aside from Search traffic, RDDT is seeing encouraging early results from onboarding, conversion, & feed optimizations, & advertising momentum remains very strong. In 2Q, RDDT delivered 60%+ revenue growth for the eighth consecutive quarter, while key profit and cash flow metrics more than doubled Y/Y. We recognize RDDT's unique financial profile & are encouraged by early product-driven engagement gains, but lack of visibility into future Google search & internet landscape changes remains a risk. We remain Neutral rated and are establishing a December 2027 PT of \$185 based on ~12x our 2028 Adj. EBITDA of \$2.9B.

- Early Product Traction Offset by Search Headwinds.** 2Q DAUq of 130M (+18% Y/Y) was in-line with expectations, but US DAUq declined -300k Q/Q driven by continued Search headwinds. Search referral traffic was choppy during the quarter, with changes to machine-translated content rankings impacting international users, while ongoing construction of the Search ecosystem drove pressure in the US. **Traffic headwinds worsened later in 2Q & visibility remains limited, with volatility likely to continue.** That said, RDDT remains focused on its goal of 1B global DAUq & 100M US DAUq over time & is seeing encouraging results from early product initiatives. Updated feed models are increasing contribution rates & session frequency, and improvements in web-to-app conversion & onboarding drove new app user retention +50% Y/Y. RDDT believes there is significant headroom with feed optimizations, including opportunities to improve ML models across scale, speed, candidate selection, & the quality of user signals incorporated. We project DAUq of 134M in 3Q (4M Net Adds) & 138M in 2026 (17M Net Adds) & note that RDDT will no longer report logged-in vs. logged-out DAUq going forward, as previously disclosed.
- Continued Strength Across Ads & Operating Discipline.** 2Q Revenue of \$805M (+61% Y/Y) exceeded the high-end of mgmt's \$715M-725M guide and ad revenue grew 64% Y/Y. Advertising strength remained broad-based & total active advertisers grew 70%+ Y/Y in 2Q. In the qtr, mid-and-lower funnel performance objectives contributed meaningfully with revenue from dynamic product ads and app installs each more than doubling Y/Y. Looking ahead, RDDT plans to expand Max to a broader range of advertisers and make it the primary onboarding experience for SMBs after initial success, with the number of advertisers using Max +60% Q/Q and Max revenue +150% Q/Q in 2Q. Summary Investment Thesis and Valuation

Investment Thesis

Reddit is a global digital city comprising 100k+ subreddits for users to share information, learn, and engage around specific topics and interests. DAUq growth remains strong and there is meaningful headroom for growth, but for now Reddit's DAUq base is relatively sub-scale. Smaller digital ad platforms have historically struggled to compete w/Google and Meta. But Reddit has low-hanging fruit that should support 20%+ ad revenue growth over the next few years. Data licensing brings an intriguing Gen AI angle to the story, and we expect deals to be more collaborative & strategic over time. Reddit should also have high incremental margins and is capex light. We recognize fundamentals appear strong, but we remain on the sidelines as we: **1)** look for greater confidence in DAUq trajectory over time; **2)** look for greater traction in the highly competitive online ad space; & **3)** look for greater top-of-funnel diversification & execution across core product initiatives.

Valuation

We are establishing a December 2027 PT of \$185 (vs. prior December 2026 PT of \$200) based on ~12x our 2028 Adj. EBITDA of \$2.9B. This reflects a premium to SNAP & PINS trading at ~5x 2028E Adj. EBITDA on average. We believe RDDT warrants a premium given its premium growth profile & greater profitability.

project revenue of \$924M in 3Q (+58% Y/Y & above the high-end of mgmt's \$860-870M guide) and \$3,521M in 2026 (+60% Y/Y). Shifting to profits, 2Q Adj. EBITDA of \$343M (43% margin) came in well above the high-end of mgmt's \$285-295M guide as strong topline growth & cost discipline offset investments in high ROI headcount, ML, ad tech, & product. In the qtr, RDDT repurchased \$235M of shares. We project Adj. EBITDA of \$430M in 2Q (47% margin; above the high-end of mgmt's \$385-395M guide) and \$1,591M in 2026 (45% margin).

- **Other Notable Points.** **1)** Overall paid marketing results were mixed in 2Q w/ encouraging signals around RDDT's new brand campaign "People Are the Best", but user acquisition spend needs stronger retention to improve returns; **2)** Revenue from mid-market & SMBs doubled Y/Y in 2Q; **3)** RDDT launched dual attribution in beta in 2Q, combining 1P attribution signals with existing mobile measurement partner signals to improve ML models, campaign optimizations, and advertiser outcomes; **4)** RDDT believes the macro environment remains healthy & efforts to diversify the advertiser base provide greater resiliency, w/11 of the top 15 verticals growing 50%+ Y/Y; **5)** On-platform engagement remains healthy w/posts per logged-in DAUq & comments per logged-in DAUq both up Y/Y, including 1B posts and comments added to the platform since 1Q

Investment Thesis, Valuation and Risks

Reddit (Neutral; Price Target: \$185.00)

Investment Thesis

Reddit is a global digital city comprising 100k+ subreddits for users to share information, learn, and engage around specific topics and interests. DAUq growth remains strong and there is meaningful headroom for growth, but for now Reddit's DAUq base is relatively sub-scale. Smaller digital ad platforms have historically struggled to compete w/Google and Meta. But Reddit has low-hanging fruit that should support 20%+ ad revenue growth over the next few years. Data licensing brings an intriguing Gen AI angle to the story, and we expect deals to be more collaborative & strategic over time. Reddit should also have high incremental margins and is capex light. We recognize fundamentals appear strong, but we remain on the sidelines as we: **1)** look for greater confidence in DAUq trajectory over time; **2)** look for greater traction in the highly competitive online ad space; & **3)** look for greater top-of-funnel diversification & execution across core product initiatives.

Valuation

We are establishing a December 2027 PT of \$185 (vs. prior December 2026 PT of \$200) based on ~12x our 2028 Adj. EBITDA of \$2.9B. This reflects a premium to SNAP & PINS trading at ~5x 2028E Adj. EBITDA on average. We believe RDDT warrants a premium given its premium growth profile & greater profitability.

Risks to Rating and Price Target

Upside Risks

- **DAUq Upside:** **1)** New products & improvements attract users; **2)** favorable Google algo changes; **3)** successful marketing initiatives; **4)** language translation.
- **ARPU Upside:** **1)** Users spend more time on the platform; **2)** RDDT improves ad tech & taps into DR & self-serve; **3)** int'l.
- **Data Licensing Upside:** RDDT announces additional partners and/or renews partnerships at more favorable terms.
- **Cost Discipline:** **1)** Dual cloud structure drives better hosting costs; **2)** focus on headcount; **3)** data licensing deals should be margin accretive.

Downside Risks

- **DAUq/Engagement Slows:** **1)** New users prove less sticky; **2)** unfavorable GOOG algo changes; **3)** localizing content is challenging; **4)** users skew logged-out; **5)** product changes/ad load drive users away.
- **Moderator Power:** Moderators can be disruptive if they do not agree w/RDDT policy.
- **Slower ARPU Expansion:** **1)** Ad tech never catches up; **2)** privacy changes; **3)** NSFW content; **4)** RDDT fails to scale DR/SMBs; **6)** RDDT struggles to grow int'l.
- **Data Licensing:** **1)** RDDT does not attract add'l partners; **2)** Existing deals do not renew in '26 or renew at less favorable terms; **3)** FTC lawsuit/other regulation.
- **Slower Path to Profitability:** **1)** New content types grow faster; **2)** RDDT fails to effectively scale & drive leverage; **3)** high levels of SBC weigh on GAAP profits.
- **Multi-Class Share Structure with Voting Disparities.**

Reddit (RDDT, RDDT US) Price Chart

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Apr 15, 2024. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
