Hong Kong SAR

Primary market

- **The Atlas 擎海 (by Yuexiu; in Yau Tong)** launched the third batch (132 units) for sale at HK$15.0K psf (2% above the second batch / 7% below secondary) and was **100% sold**.
- **Sierra Sea Ph2C (by SHKP; in Sai Sha)** launched the second (128 units) and third batch (153 units) for sale at HK$14.7K psf (6% below secondary), and was **100% sold**.
- **33 Clear Water Bay Ph1 33清水灣1期** (by Kowloon Dev; in Ngau Chi Wan) launched the first batch (73 units) for sale at HK$23.9K psf (37% above secondary) and was **30% sold**. We believe the lower sell-through rate is mostly due to the aggressive pricing.

Secondary market

- **Transactions (top 35 estates) totaled 50 units**, +32% W/W; down 41% Y/Y (Figure 13)
- **Weekend appointments (top 15 estates):** down 2% W/W; up 1% Y/Y (Figure 11).
- **Home price index:** down 0.1% W/W (prior: -0.7%) (Figure 14). Home prices have risen 11.0% YTD, within our full year forecast of 10-15%. We expect home prices to stay range-bound in the near term (report).
- **Centaline Valuation Index: down from 49.5 to 47.8** (Figure 15).

Tourist arrivals

- **Total/Mainland tourist arrivals:** tracking +8%/11% Y/Y for the first 25 days of October (month-to-date).

Share price moves

- **Share price moves** (Figure 19)**:** The sector rose 1.6% last week, outperforming the HSI (-3.5%), likely thanks to sector rotation to non-tech sectors with stronger defensiveness. Outperformers: **JM** (+4%), **Link REIT, HKL, Swire Prop & CKA** (+3%); underperformer : **HLP** (-3%).
- **Southbound holdings were flat W/W** (Table 7): Sino Land +0.5%; HLP -0.1%.
- **J.P. Morgan top picks: Swire Prop**, **HKL** and **Wharf REIC** among landlords; **CKA** among developers; **JM** and **CKH** among conglomerates.

Credit View (by Alvin Au)

- **The JACI China HY Property index dropped 0.34% (vs China HY: -0.34%) last week, lowering YTD returns to +7.97%.**
- **Zhuhai Huafa:** Bloomberg reported yesterday that Zhuhai Huafa, a Zhuhai-based SOE conglomerate, is in talks with banks to extend loan repayment and lower interest rates. The banks had not agreed to the extension terms, and this comes after Huafa missed payments on two trust products that came due recently. Huafa's '27s CNH bond price has dropped from 98 to 72 in response to the news.
- **Vanke:** Debtwire reported that Vanke proposes to add HK$5.44bn of bilateral loans to its originally planned three-year term-out of HK$23.23bn offshore unsecured loans. Vanke will consider how to handle its offshore bonds after the loan extension, according to the report.
- **Longfor:** Debtwire reported that Longfor targets to raise Rmb5bn in loans backed by its five new shopping malls (two in Changsha, one each in Hangzhou, Chengdu and Kunming). It expects revaluation of some existing malls in 2H26 could bring in an additional Rmb1bn in loans, and Longfor prefers raising funds via IP-backed loans to REIT issuance due to tax implications.
- **J.P. Morgan top picks:** New World Development 10.131% perp (95 offer, 11.6% ytw) and 12.179% perp (91.3 offer, 15.1% ytw), Champion REIT '30s (87.1 offer, 7% ytw), Hysan 7.2% perp (101.7 offer, 6.7% ytc), and Longfor '29s (82.5 offer, 11.3% ytw).

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

The table(s) above show the recommendation changes made by J.P. Morgan Credit Research Analysts in the subject company and/or instruments over the past three years (or, if no recommendation changes were made during that period, the most recent change). Notes: Effective April 11, 2016, J.P. Morgan changed its Credit Research Ratings System. Please see the Explanation of Credit Research Ratings below for the new definitions. Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:
J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company's underlying credit trends, overall creditworthiness and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company's cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company's individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer's capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used. We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). For CDS, we use the following rating system: Long Risk (over the next three months, the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).
