More operational details were provided during analyst briefing
Fuyao's auto glass segment delivered a 3.8% revenue growth y-y in 9M26, which can be broken down into 5.5% growth in the domestic market and 2.0% growth overseas. The company's topline growth remains stronger than the 1% decline in global auto production, but came in lower than our estimates. ASP up 6.4% y-y in 9M26, down from 7.4% in 1H26. Management mainly attributed the decline to the high base in 3Q25, tariff refunds, and FX impacts. For the long-run ASP trajectory, the company maintained its guidance of 6-7% y-y growth.

Core margin slid on one-offs costs and sea freight
Fuyao reported a core profit margin of 22.4% in 9M26, up 0.15ppts y-y, implying a core profit margin of 21.6% in 3Q26, down from 22.6% in 3Q25. According to management, the c.1ppts y-y decline in core profit margin was driven by a 0.8ppts rise in sea freight and a 0.23ppts impact from one-off quality issues. Fuyao expects the sea freight inflation to reverse in 4Q26. Additionally, the company's overall expense ratio rose to 15.6% in 3Q26 from 14.6% in 3Q25, reflecting reduced operating leverage as topline growth slowed, in our view.

Competition landscape improving; overseas markets emerging as new growth drivers
Fuyao expects the closure of a major competitor's plant to accelerate its market share gains in the EU, where it holds c.1/3 market share (vs 70% in the China market). The company has also observed that the trends of electrification and smart driving in Europe are accelerating. As for the China market outlook, Fuyao believes 2Q26 was a trough, and expects a further q-q revenue recovery in 4Q26.

Trim 2026E/27E net profit by 9%/8%; cut Fuyao A/H TP to RMB76/HKD76
We cut Fuyao's shipment volume forecasts to reflect weak global auto demand, and trim 2026E/27E EPS forecasts by 9%/8%. Based on 2026E/27E average adjusted EPS (excl. FX) and 20x/18x (unchanged) target P/E, we derive Fuyao A/H's new TP of RMB76/HKD76.

Investment case, valuation and risks

Fuyao Glass (Outperform, Target Price CNY76)

Investment case

We believe Fuyao Glass Industry Group-A remains one of the best investment targets in the industry, thanks to: 1) its dominant position in China/global market (we estimate c60%+/40%+ market share in 2024), supporting it to avoid price wars and maintain reasonable bargaining power with OEMs; 2) its wide client coverage, making it insensitive to any market share loss of individual customers; 3) higher visibility on the upgrade trend towards panoramic glass and Head-up Display (HUD). We expect Fuyao Glass Industry Group-A to maintain high-single-digit growth in sales value per vehicle over the next two to three years.

Valuation methodology

We adopt a target P/E-multiple valuation methodology to value Fuyao Glass Industry Group-A given its stable earnings growth momentum.

Risks

To the upside:
1) Faster-than-expected ASP expansion pace; 2) higher-than-expected panoramic glass penetration; 3) successful overseas operations in the US.

To the downside:
1) Slower-than-expected ASP growth; 2) weaker-than-expected profit margins; 3) slowdown in the adoption of panoramic glass; 4) geopolitical tensions; and 5) a potential macro-economic recession.

Explanation of Research Ratings

Rating System

Our coverage analysts use a rating system in which they rate stocks as Outperform, Neutral, or Underperform (as defined below) relative to other companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Outperform (O/P): The stock is expected to outperform the average total return of all companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Neutral: The stock is expected to perform in line with the average total return of all companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Underperform (U/P): The stock is expected to underperform the average total return of all companies covered by the analyst or the analyst's team, over a 12-month investment horizon.

Under review: The rating of the stock has been placed under review after significant news. Any possible change will be confirmed as soon as possible in the form of a new broadly disseminated report.

Restricted (RS): The stock is covered by BNPP but there is no Rating and no Target Price because BNPP is involved in an equity capital market/ merger and acquisition transaction relating to the subject company.

Not Rated (NR): The stock is covered by BNPP but there is no Rating and no Target Price at this time.

Not Covered (NC): BNPP does not cover this company

As of 23 September 2024, TEB Investment has changed the recommendation rating structure for Turkish stock coverage from Buy, Hold and Reduce to Outperform, Neutral and Underperform. Ratings and target prices for dates prior to 23 September 2024 used an absolute rating structure whereby the upside or downside to target price relative to the current share price determined the recommendation. TEB Investment now uses a relative recommendation structure whereby the applied rating is based on the stock's expected performance as compared to the average total return of all companies covered by the analyst or the analyst's team in Turkish stock coverage over a 12-month investment horizon. TEB Investment research reports with ratings and target prices for dates prior to 11 August 2025 were prepared and distributed without involvement of a FINRA member firm.

ESG Rating Explanation and Methodology

ESG integration methodology: The BNP Paribas approach offers an alternative to mechanistic ESG scores and leverages the in-depth knowledge of our industry equity research teams by combining quantitative and qualitative factors. There are three steps to our framework; firstly, our teams build a materiality map to assess which ESG topics are most relevant to their respective industries. Secondly, for the chosen topics, companies are assessed relative to sector peers. The assessment can be based on metrics and qualitative judgements. Each company is given a one to five score per topic, with five being the best. Thirdly, based on the topic scores, and any other significant ESG factors, we identify companies in the sector as ESG Leaders, ESG Laggards or ESG Average. The definition of the ratings is shown below; they are not based on the average topic score as some topic scores can be more material than others.

ESG Leader: Relative to sector peers an ESG Leader is better positioned on the chosen ESG topics, or other relevant ESG considerations.

ESG Average: A company rated as ESG Average may have strong or poor performance on an individual ESG topic, but overall has an average exposure to ESG risks and opportunities.

ESG Laggard: Relative to sector peers an ESG Laggard is poorly positioned on the chosen ESG topics, or other relevant ESG considerations for the stock.

Distribution of BNP Paribas' Equity Recommendations

As at 01 October 2026 BNP Paribas covered 1427 companies. The companies that, for regulatory reasons, are not accorded a rating by BNPP are excluded from these statistics. For regulatory reasons, our ratings of Outperform, Neutral and Underperform correspond respectively to Buy, Hold and Sell; the underlying signification is, however, different as our ratings are relative to the sector.

Ratings	Stocks coverage		Investment Banking Services Within the previous 12 months	
	Counts	%*	Counts	%
Outperform (Buy)	751	53	164	22
Neutral (Hold)	476	33	104	22
Underperform (Sell)	200	14	40	20

* Please note that the percentages might not add up to 100% because of rounding.

There may be limited information available on non-U.S. securities. Non-U.S. companies are generally not subject to uniform audit and reporting standards, practices, and requirements comparable to those in the U.S. The securities of some non-U.S. companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a non-U.S. stock and its corresponding dividend payment for U.S. investors. If a financial instrument is denominated in a currency other than the investor's home currency, a change in exchange rates may adversely affect the price of, value of, or income derived from the financial instrument described in this report. In addition, investors in securities such as ADRs, whose values are affected by the currency of the underlying security, effectively assume currency risk.
