AI Wars: Claude and Gemini ramping, Meta AI small base but growing, Google stable

Maintain Rating: BUY | PO: 430.00 USD | Price: 368.53 USD

Web traffic: Claude and Meta AI have best m/m growth

Per Similarweb, May global daily avg. web visits to Google were up 5% y/y to 2.8bn, ChatGPT was +2% y/y to 180mn, Gemini was +451% y/y, Claude was +857% y/y, and Meta AI was +105% y/y. On m/m basis, Google was flat, ChatGPT was down 2%, Gemini was +2%, Claude was +14%, and Meta AI was +17%. In the US, Web visits to Google were +2% y/y to 535mn, ChatGPT was +25% y/y to 32mn (6% of Google), Gemini was +289% y/y, Claude was +760% y/y, and Meta AI was +42% y/y. On m/m basis, Google was down 2%, ChatGPT was -7%, Gemini was -5%, Claude was +2%, & Meta AI +2%.

Mobile DAUs: Gemini and ChatGPT add 10mn users m/m

In May, per Sensor Tower, Google global mobile DAUs increased 12% y/y (+1% m/m) to 2.2bn, ChatGPT was up 68% y/y to 438mn (+2% m/m), Gemini up 321% y/y to 110mn (+10% m/m), Claude +1,349% to 17mn (+22% m/m), Meta AI +1,321% to 10mn (+25% m/m), & Perplexity +67% y/y to 8m. In the month of May, Gemini added 10mn DAUs m/m, ChatGPT also added 10mn, Claude added 3mn while Meta AI added 3mn.

Search share: Google global share marginally up y/y

Per Statcounter, Google's global search share was up 44bps m/m vs. Bing down 16bps m/m. On a y/y basis, Google's market share was up 89bps y/y to 90.5% while Bing's gained 100bps y/y to 5.0%, and Others were down 195bps y/y to 3.2%. In the US, Google's search market share was up 66bps m/m to 85.8% (down 111bps y/y).

Claude and Gemini growth strong, Google trends stable

In May, Google traffic & user growth was largely stable while ChatGPT grew but decelerated on a y/y basis, while Claude, Gemini and Meta AI continued to gain traction. We think the new ad formats Google announced at Marketing Live should help capitalize on growing AI search format usage (1bn users of AI Mode, Gemini at 900mn MAUs) and could accelerate Search monetization. Maintain Buy on Alphabet. Also, data suggests growing engagement on the standalone Meta AI app, as Meta utilizes its large user base to drive adoption of new surfaces. Maintain Buy on Meta. Next Google usage catalysts: Broader availability of Gemini 3.5 Pro and rollout of new agentic search features announced at I/O.

Company Sector

Internet/e-Commerce

Company Description

Alphabet is a global technology company focused on key areas, such as search, advertising, operating systems and platforms, enterprise and hardware products. The company generates revenue primarily by delivering online advertising and by selling apps and content on Google Play as well as hardware products. The company provides its products and services in more than 100 languages and in 190 countries, regions, and territories.

Investment Rationale

We see Alphabet as well positioned long term with leading AI technology to apply to search, YouTube, and Cloud businesses. Alphabet should also benefit from increasing mobile usage, video usage, Google Play activity, and connected device activity (including autos). We believe that Alphabet should trade at a premium to a media peer group given technology leadership, high margins, and strong cash flow generation for buybacks.

BofA GLOBAL RESEARCH

Price objective basis & risk

Alphabet (GOOGL / GOOG)

Our price objective of \$430/\$430 is based on 28x 2027E core Google GAAP EPS plus cash per share. Alphabet has traded at an average multiple of 22x GAAP P/E over the last ten years, and we think our target multiple is reasonable vs history given expectations for double-digit revenue growth, Cloud margin expansion, and opportunity to capitalize on strong AI assets.

Downside risks are 1) loss of search traffic to AI tools from competitors, 2) LLM integration in search may take longer than expected or negatively impact search revenues, 3) revenue pressure from compliance with the EU Digital Markets Act (DMA), and 4) potential for increasing Capex and lower FCF-given AI investments.

Meta Platforms Inc (META; \$593; B-1-7)

Our \$835 price objective is based on 24x 2027E GAAP EPS, plus net cash. On a total company basis, including Metaverse investments, our valuation is at a slight premium to S&P 500 given Meta's higher growth rate and AI opportunity. Historically, Meta has traded at an average premium of 3pts to S&P 500.

Downside risks include: 1) Significant dependence on digital advertising revenue, which remain highly sensitive to macroeconomic conditions, 2) Elevated spend on AI initiatives that could negatively impact margins, 3) Growing base of fixed assets could reduce cost flexibility in a macro downturn, 4) Slowing pace of share repurchases with significant AI investments, 5) Intensifying competition for user engagement and advertising budgets from AI-native platforms, and 6) Elevated regulatory overhang from new teen safety cases or unfavorable outcomes in ongoing litigation.

Equity Investment Rating Distribution: Technology Group (as of 31 Mar 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	234	58.50%	Buy	123	52.56%
Hold	90	22.50%	Hold	43	47.78%
Sell	76	19.00%	Sell	23	30.26%

Equity Investment Rating Distribution: Global Group (as of 31 Mar 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1993	55.76%	Buy	1186	59.51%
Hold	821	22.97%	Hold	509	62.00%
Sell	760	21.26%	Sell	400	52.63%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed.

Taiwan Readers: Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument. No part of this report may be used or reproduced or quoted in any manner whatsoever in Taiwan by the press or any other person without the express written consent of BofA Securities.

This document provides general information only, and has been prepared for, and is intended for general distribution to, BofA Securities clients. Neither the information nor any opinion expressed constitutes an offer or an invitation to make an offer, to buy or sell any securities or other financial instrument or any derivative related to such securities or instruments (e.g., options, futures, warrants, and contracts for differences). This document is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of, and is not directed to, any specific person(s). This document and its content do not constitute, and should not be considered to constitute, investment advice for purposes of ERISA, the US tax code, the Investment Advisers Act or otherwise. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.

In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS). If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.
