

Property Data Monitor

Mainland China: weekly sales turn worse due to holidays; HK: home prices up another 0.6% W/W

Mainland China

- **Iceberg 10-city real-time secondary weekly sales (冰山指数实时二手成交) dropped 0.05% Y/Y (down from +13% Y/Y).** Tier-1 cities' weekly sales dropped 3% Y/Y (down from +14%) (Table 1). The decline is mostly due to the Dragon Boat Festival. **If we compare last week's data vs. the week with the same festival last year, 10-city & tier-1 sales would be up 15%/10% Y/Y.** Real-time sales generally lead the trend of official sales registrations by a few weeks.
- **Iceberg 10-city secondary listings (冰山指数二手挂牌量) fell further, down 0.2% W/W.** Tier-1 cities' listings dropped 0.5% W/W, while Shanghai's dropped another 1.1% W/W (prior: -0.6%)(Table 2). The volume of secondary listings in tier-1 cities has been consistently coming down (down 2.6% from the peak in March), and this is a key factor that will support continual secondary home price stabilization.
- **60-city primary sales registrations (一手网签) fell 23% Y/Y (more),** mostly due to the inclusion of the 3-day Dragon Boat Festival (during public holidays, sales registrations are significantly lower than usual). Compared to the same 3-day Dragon Boat Festival period in 2025, sales registrations were up 60% Y/Y (but the sample size is too small, hence we do not think this alone is representative).
- **12-city secondary sales registrations (二手网签) fell 13% Y/Y (Figure 7),** reversing the positive Y/Y growth for the past 9 weeks (due to public holidays). Shanghai (+12%) is the only city with Y/Y growth among tier-1 cities. YTD, 12-city secondary sales have risen 5% Y/Y (Shanghai: +13%).
- **The Centaline tier-1 cities' secondary asking price index dropped mildly from 17.8 to 17.3 (Figure 3).**
- **The Centaline manager confidence index dropped from 53 to 51 (Figure 4).**
- **Southbound holdings rose 0.32% W/W (Table 7):** Sunac +2.4%; CRL +0.9%
- **Share price moves (Figure 17):** The sector dropped 13% last week, underperforming the HSI (-5%). The outperformer was **Sunac** (-5%). The underperformers were **A-Living** (-20%) and **Longfor** (-17%). For further discussion, please see our report [China Property: Why the recent share price weakness?](#).
- **J.P. Morgan top picks: COLI, CR Land, Jinmao and CR Mixc.**

Hong Kong SAR

- **The home price index rose 0.6% W/W (Figure 12).** Home prices have risen 10.4% YTD, already reaching our full-year target of 10-15%. Looking ahead to 2H26, we expect slower price growth of <5%. For more discussion, please see our report [HK Residential Property: Home prices already hit our full-year target; momentum may slow in 2H.](#)
- **Secondary transactions in the top 35 estates totaled 43 units, down 16%**

W/W & down 47% Y/Y (Figure 11), the lowest since CNY. This is partially due to adverse weather.

- **The Centa Salesman Index (CSI)** (Figure 14) **moderated from 69.6 last week to 68.2**. A reading of >50 = sentiment is positive and property prices are likely to rise.
- **The Centaline Valuation Index (CVI)** **rose from 82.7 last week to 86.2 this week**.
- **Southbound holdings fell 0.07% W/W** (Table 7): Hang Lung Prop -0.6%; Swire Prop +0.04%.
- **Share price moves** (Figure 18): The sector dropped 4.4% last week, marginally outperforming the HSI (-4.7%). The outperformer was **HKL** (-1%), followed by **Hysan** and **JM** (both -2%), while **Champion REIT** and **NWD** (both -8%) underperformed.
- **J.P. Morgan top picks:** Developers – **CKA, Sino**; landlords – **Swire Prop & HKL**; conglomerates – **JM & CKH**.

Credit View (by Alvin Au)

- **The JACI China HY Property index rose 0.3% (vs China HY: +0.16%) last week**, resuming the uptrend after a brief correction the previous week. This brings YTD returns to +6.4%.
- **Seazen:** Debtwire reported that Seazen is planning a Rmb2bn tap of private REIT as soon as in June. This is on top of a Rmb616mn private REIT issued in Nov 2025 backed by its Shanghai Qingpu Wuyue Plaza, and the developer will add two more shopping malls in Tianjin and Nantong as underlying assets for this tap. We think the scale of the tap is material, as it more than covers the Rmb1.7bn of onshore maturities for the rest of 2026. Management mentioned earlier that it is planning to launch a public REIT as an additional funding channel later in 2026 as well.
- **Continued K-shape for China's housing market as reflected in May 2026 NBS data:** Top-tier cities remain solid as all four tier-1 cities report positive m/m increase in secondary home price (for the third month in a row). However, the broader industry remains weak with the 70-city m/m decline marginally widening from -0.23% in April to -0.26% in May (see details in [equity report](#)). As market fragmentation continues, we continue to prefer credits with IP transformation stories, solid debt servicing ability and decent valuations.
- **J.P. Morgan top picks:** LNGFOR '29s (84 offer, 9.9% ytm) and SHUION '29s (101.5 offer, 9.1% ytm).

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

The table(s) above show the recommendation changes made by J.P. Morgan Credit Research Analysts in the subject company and/or instruments over the past three years (or, if no recommendation changes were made during that period, the most recent change). Notes: Effective April 11, 2016, J.P. Morgan changed its Credit Research Ratings System. Please see the Explanation of Credit Research Ratings below for the new definitions. The previous rating system no longer should be relied upon. For the history prior to April 11, 2016, please call 1-800-447-0406 or e-mail research.disclosure.inquiries@jpmorgan.com.

Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:

J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company's underlying credit trends, overall creditworthiness and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company's cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company's individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer's capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used. We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). For CDS, we use the following rating system: Long Risk (over the next three months, the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).

J.P. Morgan Credit Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
Global Credit Research Universe*	27%	57%	16%
IB clients**	84%	84%	89%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "Overweight," "Neutral" and "Underweight" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. The Credit Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.
